

# ASIM AYDIN

## JUNIOR FULLSTACK DEVELOPER

### ABOUT ME

+90 538 420 06 81 · [asimaydin.dev@gmail.com](mailto:asimaydin.dev@gmail.com) · [Linkedin](#) · [Github](#) · [Giresun/Türkiye](#)

I've been passionate about computers from an early age, which naturally led me to explore the world of software development during high school. I graduated from a Computer Technical Service program in high school and continued my education in Computer Programming at university. Throughout this journey, I've gained both theoretical knowledge and hands-on experience in software development. My goal now is to build a solid career in this field and continuously improve myself along the way. With a curious mind, strong determination, and a problem-solving mindset, I am working hard to take confident steps into the software industry.

### STRENGTHS AND EXPERTISE

**Languages:** HTML, CSS, Bootstrap, JavaScript, React

**Frameworks and Technologies:** React, Git, GitHub, Vite, Bootstrap, NPM, Visual Studio Code

**Soft Skill:** Strong communication skills, Problem-solving ability, Eager to learn, Responsible and reliable

### PROJECTS

**Starbucks Clone** | [Code](#) | [Live View](#)

**Technologies:** HTML, CSS, Bootstrap

- This project is a clone of Starbucks' official website, developed using Bootstrap 5, HTML, and CSS. It aims to provide a similar user experience by emulating Starbucks' modern and responsive design.

**Amazon Clone** | [Code](#) | [Live View](#)

**Technologies:** HTML, CSS, Bootstrap

- This project is a clone of Amazon's official website, developed using Bootstrap 5, HTML, and CSS. It aims to provide a similar user experience by emulating Amazon's modern and responsive design.

**Tab Switcher** | [Code](#) | [Live View](#)

**Technologies:** Javascript, HTML, CSS, Bootstrap

- This project provides a dynamic tab switching feature using JavaScript and Bootstrap. When the page loads, the first tab is active by default. Clicking on the buttons displays the corresponding tab content and changes the active button's color.

**Scoreboard Project with JavaScript and CSS** | [Code](#) | [Live View](#)

**Technologies:** JavaScript, CSS, Bootstrap, HTML

- I developed a project where users can filter Star Wars characters based on various criteria such as name, species, and affiliation (Jedi, Sith, etc.). This application was built using HTML, Bootstrap, and JavaScript, providing a user-friendly interface. It includes dynamic search and filtering features that allow users to easily navigate through the Star Wars character database.

**Star Wars Character Filtering Project** | [Code](#) | [Live View](#)

**Technologies:** HTML, CSS, Bootstrap, Javascript

- I developed a project where users can filter Star Wars characters based on various criteria such as name, species, and affiliation (Jedi, Sith, etc.). This application was built using HTML, CSS, and JavaScript, providing a user-friendly interface. It includes dynamic search and filtering features that allow users to easily navigate through the Star Wars character database.

---

## WORK EXPERIENCE

### Customer Service Representative

December 2021 - Current

Türk Telekom – Internet Technical Support & TV Subscription Department

- Provided support for internet connection issues and technical troubleshooting.
- Assisted customers with Tivibu cancellation requests and service-related inquiries.
- Delivered customer-focused solutions while maintaining service quality and satisfaction.
- Gained experience in handling various customer needs in a fast-paced environment.

### Giresun Provincial Directorate of Migration Management

March 2024 - Current

Worked at the Giresun Provincial Directorate of Migration Management, where I gained valuable experience in migration-related processes and administrative tasks. During my 6-month tenure, I assisted in various projects and contributed to improving the efficiency of internal operations. Collaborated with a diverse team, helping manage and streamline services provided to migrants and refugees in the region.

---

## EDUCATION

### Ordu University | Computer Programming

September 2020 - Current

**Classes:** C#, Mathematics For Programs, Open Source Operating Systems, Database Management, Advanced Web Development, Algorithms

### OnlyJS Academy | Full Stack Development Trainee

December 2024 - Current

I am currently continuing my education at OnlyJs Academy, where I am learning modern web development technologies including HTML, CSS, Bootstrap, JavaScript, React, Vite, and SASS. I focus on building user-friendly and responsive interfaces using HTML, CSS, Bootstrap, and SASS. While developing interactive features with JavaScript, I also work on creating applications with modern tools like React and Vite. With a passion for coding and a mindset open to improvement, I am making the most out of this educational journey.

**Classes:** HTML, CSS, Bootstrap, SASS, JavaScript, Vite, React, NPM
